PROFILE

MCA graduate and MERN Stack Intern with a strong foundation in Java, Python, object-oriented programming, data structures, algorithms and relational databases. Experienced in building full web applications end to end, integrating REST APIs, and debugging. Strong problem-solving and communication skills, seeking a Software Developer role.

SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Material UI, Responsive Web Design
State & Routing	Redux Toolkit, React Redux, React Router DOM
Backend & APIs	Node.js (fundamentals), REST APIs, API Integration, Axios, JSON Server
Libraries & Tools	React Leaflet, Leaflet, Vite, Git, GitHub, VS Code
Other	Java, Python, PHP, SQL, MySQL, OOP, Data Structures, Algorithms
Soft Skills	Problem Solving, Communication, Collaboration, Analytical Thinking, Adaptability

EXPERIENCE

MERN Stack Intern | Luminar Technolab, Kochi, Kerala June 2026 - Present

- Develop and maintain web application features using React.js, JavaScript, HTML5, CSS3 and Bootstrap.
- Integrate REST APIs and implement CRUD operations, data handling and form validation.
- Debug application issues, troubleshoot functionality and collaborate on development tasks throughout the application workflow.

PROJECTS

RescueGrid: Emergency Response & Relief Management Platform

- Built a responsive React.js (Vite) app where citizens report floods, landslides, heavy rainfall and fires, with live location detection and status tracking from submission to resolution.
- Created an interactive emergency map with React Leaflet and OpenStreetMap to display reported incidents geographically.
- Managed centralized state with Redux Toolkit and async API calls with createAsyncThunk; used React Router DOM, Axios and JSON Server.
- Delivered 9 feature modules, including an admin dashboard, volunteer registration and assignment, relief centre management and relief inventory tracking.
- **Tech:** React.js, JavaScript, Vite, Redux Toolkit, React Router DOM, Axios, Bootstrap, React Leaflet, OpenStreetMap, JSON Server

FoodDash: Food Ordering Application

- Built a React food ordering app where users explore food products and search items.
- Implemented 3 key shopping features: cart and wishlist management, and a checkout flow with form validation.
- **Tech:** React, JavaScript, React Router, Bootstrap, Axios,

Job Application Tracker

- Built a job application management system with 5 core operations: add, view, delete, search and filter functionality.
- Implemented authentication, profile management, application status tracking and dashboard insights using REST APIs and JSON Server.
- **Tech:** React, JavaScript, Axios, REST API, JSON Server, Material UI, Bootstrap

Money Morph: Financial Management System

- Built a financial management system end to end: user-facing interface, server-side logic and MySQL data layer.
- Implemented 3 user roles: Admin,User and Financial Advisor, with role-based access and functionality.
- **Tech:** PHP, MySQL, HTML, CSS, Bootstrap

Craft Connect

- Built an online platform for women to sell handmade products, with video content for sharing skills and tutorials.
- Implemented 3 user roles: Admin,User and Seller, with role-based access and functionality.
- **Tech:** PHP, MySQL, HTML, CSS, Bootstrap

EDUCATION

Master of Computer Applications (MCA) Aug 2024 - May 2026 | CGPA 7.66 / 10
College of Engineering Chengannur | APJ Abdul Kalam Technological University, Kerala

Bachelor of Computer Applications (BCA) Nov 2020 - May 2023 | CGPA 7.21 / 10
College of Applied Science Adoor | University of Kerala

CERTIFICATES

- NPTEL Cloud Computing – Elite Certificate, April 2026
